From:

Name: _____

Others with access to data: _____

Institution: _____

Address: _____

Email: _____

Subject:

Data confidentiality agreement for the participation to the **stenoses detection/quantification and lumen segmentation evaluation framework**

We, the undersigned's, agree to contribute to the **stenoses detection/quantification and lumen segmentation evaluation framework** by 1) (semi-)automatically detect and quantify stenoses, and 2) (semi-)automatically segment the coronary artery lumen from 48 CTA datasets.

The undersigned's:

- pledge that none of the CTA and the reference standard datasets provided by the organizers will be given away or distributed under any circumstances to persons other than the people mentioned above.
- pledge that the CTA data will be used exclusively for the evaluation of stenoses detection/quantification and lumen segmentation methods through the Rotterdam Coronary Artery Algorithm Evaluation framework (<http://coronary.bigr.nl/stenoses>).
- pledge that, when publishing results obtained using one of the provided set of coronary artery centerlines, they will cite the corresponding paper describing the centerline extraction method. Citation details can be found on the website.
- pledge that, when publishing obtained results, they will cite the paper describing the evaluation framework. Citation details can be found on the website.
